PRT - Plastic slewing ring bearing

iglide® PRT is a slewing ring bearing with the proven advantages of the igus® plastic bearings. The sliding pads made of iglide® high-performance plastics are completely self-lubricating and maintenance-free. Anodized aluminum or stainless steel housing surfaces mate with iglide® sliding pads. All fixing screws are made of stainless steel.

- Completely maintenance free
- Easy installation; replaceable sliding pads
- High wear resistance
- For high load capacity, high rigidity
- Stainless steel versions available
- Wide range of accessories available

Typical industries and applications

- Conveyors
- Automation
- Assembly stations
- Stage and lighting technology
- Renewable energy, etc

Slewing ring bearings structure

- ① **Type 01:** Hard anodized aluminum, or 316 stainless steel
Type 02: iglide® J4 or A180
- ② **Type 01 and 04:** iglide® J or H1
- ③ **Type 01 and 02:** anodized aluminum, or 316 stainless steel

iglide® PRT-01-60 is used here in a handling/transport system for semiconductor carriers. Through a cylinder control, the PRT plastic slewing ring bearing provides a deflection at the end of the system's track.

Alfred, a food-preparation robot, scoops vegetables as it makes a salad. The robot's rotating base features a dry-running iglide® PRT slewing ring, which has been engineered with self-lubricating, maintenance-free sliding elements.

In this machine tool control panel, an iglide® plastic slewing ring bearing is used due to its freedom from external lubrication and maintenance.

The iglide® PRT-01-100 slewing ring bearing is used in an automatic welding plant in this application. It enables pivoting in the horizontal plane of the clamping device.

The self-lubricating iglide® PRT slewing ring bearing masters this job brilliantly, is lighter and in terms of purchasing is cheaper than a comparable metal rotary connector.

PRT-01-100 is used in a robot as a safer alternative to pipeline rehabilitation. The robot can safely surface blast and apply new lining systems to avoid corrosion, repair leaks and keep the system running smoothly.

Configure Configure Configure

Configurator for slewing rings

The most common criteria for selecting an iglide® PRT slewing ring bearing are firstly the loads and torques to be supported and secondly the installation space available and the minimum central implementation distance required. The suitable sizes and types are selected on the basis of this data and the speed and their service life is calculated.

— PRT-04-100 M5, min. 12 screws
— PRT-04-150 M5, min. 12 screws
— PRT-04-200 M6, min. 12 screws
— PRT-04-300 M8, min. 12 screws

All load values assume the PRT is assembled with socket head screws (strength class 8.8) on the outside pitch circle diameter. For the assembly (using strength class 8.8 screws) of the PRT, the screws have to be inserted to a minimum thread depth of $2 \times d$ in every hole location in the outer ring. All data can be used for both lateral and horizontal assembly (including overhead installation).

Slewing ring bearing with gear teeth

Standard

Stainless steel version

- 4 standards for outer drive rings are available
 - A classic spur gear according to DIN3967
 - Commercially available belt profiles: T10, AT10, HTD8M
- The inner ring is fixed and the outer ring driven
- The outer ring carries the item to be moved
- Outer ring available in stainless steel as an option (suffix "-ES")

Universal sliding elements

Customize your own slewing ring systems

Using the versatile iglide® PRT universal slide elements, large slewing ring systems can be tailored to the Type 01. Depending on the number of elements, slewing ring systems with internal diameters of 0.5 to 5 m are possible. We would be glad to assist you during the design stage.

- Made from the proven iglide® J
- Slewing ring bearings possible from 0.5 up to 5 meters
- Low wear
- Sturdy, resistant to dirt
- Corrosion free and resistant to liquids
- Self-lubricating and maintenance-free

Basic construction of type 01:

1 Slide elements made of iglide® J

Part No.
JRS-500S/45S
